Education

California State Polytechnic Pomona

March 2012

Bachelor of Science in Computer Science

Cummulative GPA: 3.51 Major GPA: 3.67

Experience

Guardtime, Senior Software Engineer

April 2018 – Present

Technologies: Kotlin, Spring Boot, RxJava, Golang, SQS, S3

- Design, and implement supply chain solutions with Guardtime's proprietary digital timestamping service
- Investigate suitable architecture for permissioned blockchain applications
- Implemented continuous integration and deployment processes

TigerText, Senior Platform Engineer

February 2015 – April 2018

Technologies: Erlang, Redis, Cassandra, ElasticSearch, Logstash, Kibana

- Implemented features for the company's real-time, enterprise messaging platform
- Worked on transitioning chat server from XMPP to HTTP Server-Sent-Event. Improved code quality and error handling
- Migrated backend storage from single Redis host to Cassandra cluster
- Involved in architecture and code review, eliciting simple and minimal design

Zipfworks Inc, Software Engineer

March 2014 – February 2015

Technologies: Scala, Akka, Spray, MongoDB, ElasticSearch, EC2, S3

- Built a REST API to support custom CMS. Features included coupon ranking, similar coupons, push notifications, and more
- Built a product-category classifier by extracting feature sets of crawled fashion inventories using Naive Bayes algorithm with high accuracy
- Integrated with FB and Google APIs
- Wrote image resizing and file uploads service
- Containerized applications and processes using Docker

OneScreen, Data Engineer

November 2013 – February 2014

Technologies: Scala, Scalding, Ruby, Hadoop (EMR), S3, Chronos

- Wrote MapReduce jobs to analyze advertising impressions, video view counts, from pixel tracking streams

- Maintained ETL pipeline from ingesting ads server logs to building impression reports in Vertica database

IBM, Software Engineer

November 2011 – October 2013

Technologies: Java, Apache Jena, Javascript, Dojo Toolkit

- Built a query engine to store RDF triplets and process SPARQL queries
- Wrote benchmarks to compare triple stores, asynchronous servlets, query execution path
- Profiled, analyzed, and documented performance characteristics with tweak on Linux settings, JVM settings, GC tuning
- Responsible for cross-functional team documentation
